Remarks:

*Amendments to the claims; new claims:*

Without prejudice or traverse, kindly enter in the indicated amendments to the claims, and enter the newly presented claims.

The applicants expressly reserve their right to reenter any canceled subject matter further in the prosecution of the present application, or in new claims which may be presented in a continuation, continuation in part or divisional application(s) which may be filed at a later date.

The applicant thanks the Examination for the full consideration of the prior art of record, and in recognizing allowable subject matter in claims 17, and 19-24.

*Regarding the rejection of claim 1 under 35 USC 112, 2<sup>nd</sup> paragraph:*

The applicant respectfully traverses the Examiner's objection to the claim and requests reconsideration of the rejection. The Examiner's attention is directed to pages 9 – 11 of the applicant's specification which discusses particulate moieties. The applicant's use of the claim term "particulate moieties" is proper in view of the specification; the compositions require at least a hydrophilic particulate moiety, and a hydrophobic particulate moiety, hence the use of the plural term "moieties". It is well settled in the law that a patent application may be their own "lexicographer", *see e.g., Autogiro Co. of America vs. U.S.* 155 USPQ 697 (Ct.Cl., 1967) at pp 702, 707-708. Applicant's specification as published, provides clear support for "particulate moieties", and the rejection should properly be withdrawn.

*Regarding the rejection of claims 1, 4, 6-12 and 14 under 35 USC 102(b) in view of WO 02/069917 to Glenn et al, (hereinafter "Glenn"):*

As the presently amended claims include the limitations of prior claim 17, the newly presented amended claim 17 and all dependent claims are believed to be allowable, and
